| Product Name   | GPS Antenna | Part No. | CCAH32ST14 | Page: 2 |

#### 1. Description:

This specification defines the requirements for a family of active GPS antennas, typically consisting of five major sub-assemblies.

They are:

- (1) Passive Dielectric Patch Antenna Element
- (2) Active Low Noise Amplifier / Filter PWB assembly
- (3) Top radome of cone shaped plastic and bottom radome of aluminum casting assembly
- (4) N-type connector assembly
- (5) Mounting base

Intend to be used mainly in Timing / Industrial applications.

(except for use at sea, on the coast)

#### 2. Appearance:

Antenna Unit (with radome, and connector - refer to an attached drawing)

Dimension Dia.90 x 98.4 mm Height (without connector)

Weight 200 +/- 20 g (Antenna)

230 +/- 20 g (Mounting base)

3. Operating Condition:

Temperature -40 to +85 deg. C

Humidity Less than 95 %RH (non-condensing)

4. Storage Condition:

Temperature -45 to +90 deg. C

Humidity Less than 95 %RH (non-condensing)

5. Output Terminal:

Connector N-type connector

| Specifications |             |          |            | Dogo: 2 |

| Product Name   | GPS Antenna | Part No. | CCAH32ST14 | Page: 3 |

#### 6. Electrical Specifications:

- \*All value are defined at 25 +/- 15 deg. C, 65 +/- 20 %RH, 5V DC unless otherwise noted.
- \*Antenna characteristics are measured in an anechoic chamber.

#### 6-1) Antenna Overall Characteristic

Polarization Right hand circular polarization

Band Width 1575.42 +/- 1.023 MHz

Power Supply 5 +/- 0.5 V DC

Current 20mA (Typical) 27mA (Maximum)

Total Gain 38dB (Typical)

30dB (Minimum) at elevation angle 90 deg.

Attenuation 60dB (Typical) at 1575.42 +/- 50 MHz

Output VSWR 1.5 (Typical) 2.5 (Maximum)

Lightning Protection 4000V for IEC61000-4-5 standard

6-2) GPS Passive Antenna (reference)

Gain 3.0dBi (Minimum) at elevation angle 90 deg.

-10dBi (Minimum) at elevation angle 0 deg.

Axial Ratio 3dB (Typical)

6-3) Filter/LNA (reference)

3dB band width 1575.42 +/- 1.023 MHz (Minimum) 1.0dB (Maximum) measured at L1 band

Gain 35dB (Typical)

Attenuation 60dB (Typical) at 1575.42 +/- 50 MHz

Noise Figure 1.8dB (Typical) 2.2 dB (Maximum)

| Specifications |             |          |            | Page: 4 |

7. Electrical Specification After Environmental Test

Measured at 25 +/- 15 deg. C, 65 +/- 20 %RH

DC Current 20mA (Typical) 27mA (Maximum)

Total Gain 38dB (Typical)

30dB (Minimum) at elevation angle 90 deg.

Output VSWR 1.5 (Typical) 2.5 (Maximum)

Appearance No visible deformations, cracks and discolorations

#### 8. Indication

The following is specified in the products. (see appearance drawing for more information)

#### 8-1) Antenna Body

Stick a label on the bottom surface of a radome.

The following is specified in the label;

- 1) Part number
- 2 Serial No

#### 8-2) Packing Material

Stick a label on the surface of a carton box.

The following is specified in the label;

- 1 Product name, Part number
- 2 Quantity (Unit)

#### 9.Package

See packing specification drawing for more information.

#### 10. Outgoing Inspection

Visual inspection and performance (overall gain, output VSWR and consumption current) inspection are made in accordance with the Panasonic Product Inspection Standard and the test result are enclosed in the carton box.

<sup>\*</sup>Refer attached environmental test method.

|              | Specifications |          |            |         |
|--------------|----------------|----------|------------|---------|
| Product Name | GPS Antenna    | Part No. | CCAH32ST14 | Page: 5 |

#### 11. Installation Precautions

- Connect a coaxial cable which is passed through a installation pole and a mounting bracket to a connector of GPS antenna.
- Install a mounting bracket to a bottom case of GPS antenna with screws for fixing to a main body.
- Fix a mounting bracket completely to an installation pole with fixing screws.

- Securely connect the connector so that water does not penetrate in from the connector part.
  - Recommended fastening torque for N connector: 0.9 Nm +/- 25%
- To prevent loosening of connector threads, fasten with self-fusing tape or another such fastening agent.

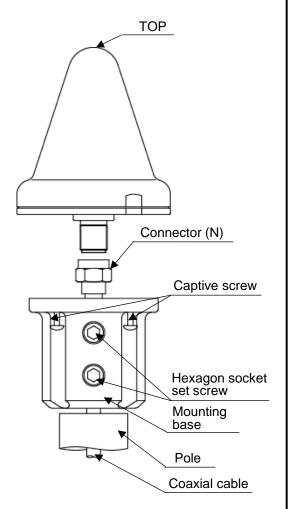

- Recommended fastening torque for Captive screw: 0.75 Nm +/- 20%
- Recommended width of installation pole : φ41~43 mm
- Recommended fastening torque for Hexagon socket set screw: 6.3 Nm +/- 20% \*if and only if installed to those polls specified below.

- Material Stainless steel (thickness about 2 mm)
- Follow the precautions below when installing the GPS antenna.
  - At a location where the sky overhead is free from obstructions, install so that the top side of the GPS antenna faces the sky.
  - Please install after checking that there are no transmitters or other such devices with a frequency near that of the GPS LI band (1575.45 MHz +/-100 MHz) in the vicinity.

#### 12. Others

- Any question arising out of this specification shall be settled upon consultation between both parties.
- Made in Japan

Approved on: May / 31 / 2016

Temperature of black panel: 63 deg. C +/- 3 deg. C rain: 12 minutes / 60 minutes  Nozzle: 1mm of diameter  Water pressure at the nozzle: 0.8 to 1.3 Kg / sq. cm  Light radiation time: 1200 hours | Standard Item<br>According to Note 2 |
| Salt atmosphere Test                                                                                                                                            | Spray 5 +/- 1 % NaCl solvent (35 deg. C +/- 2 deg. C) to the specimens for 16 hours then stop spraying 8 hours. 20 Cycles of above test.                                                                                                                                                                                                         | Standard Item<br>According to Note 2 |
| High Temperature<br>Test (Operating)                                                                                                                            | The specimens are subject to 6.0 V DC at 85 deg. C for 120 hours, then store at standard evaluation condition for more then 2 hours.                                                                                                                                                                                                             | Standard Item According to Note 2    |
| Low Temperature<br>Test (Operating)                                                                                                                             | The specimens are subject to 4.5 V DC at -40deg.C for 72 hours, then store at standard evaluation condition for more then 2 hours.                                                                                                                                                                                                               | Standard Item According to Note 2    |
| Long Time Operating<br>Test                                                                                                                                     | The specimens are subject to 5 V DC for more than 1,000 hours, then store at standard evaluation condition.                                                                                                                                                                                                                                      | Standard Item According to Note 2    |
| Static Electricity<br>Resistance Test                                                                                                                           | Adding +/- 10 KV to every touchable place at 10 times, then store at standard evaluation condition.                                                                                                                                                                                                                                              | Standard Item According to Note 2    |
| Surge Immunity<br>Test                                                                                                                                          | IEC61000-4-5,withstand +/-4KV, 8/20us surge current at 5 times.                                                                                                                                                                                                                                                                                  | Standard Item According to Note 2    |
| Package drop Test  Packaged specimens are dropped on a cement floor from 1 m height in each direction along 6 surface, 3 mutually perpendicular and one corner. |                                                                                                                                                                                                                                                                                                                                                  | Standard Item<br>According to Note 2 |

Note 1: Standard evaluation condition

Temperature : 25 deg. C +/- 15 deg. C

Humidity : 65 +/- 20%RH

Power Supply : 5V DC

Note 2: Evaluation Items

Appearance, Gain, Electric current, VSWR

Appearance: No visible deformations, cracks and discolorations

Approved on: May / 31 / 2016 Panasonic Corporation

#### Disclaimer

Our company will bear no responsibility for the following under any circumstances.

- 1. Losses or damages caused by installation or use at variance with the content of these specifications
- 2. Damages or losses caused by falling or tipping over due to reasons other than defects or problems with the product itself (including problems with installation)
- 3. Inconvenience, losses or damages caused by the inability to receive GPS signals due to any reason or cause, including malfunction or problems with the product itself

#### Safety precautions

- 1. Rely on a specialist for installation.
  - Installation requires skill and experience.
  - Always rely on an installation specialist.
- 2. Do not disassemble or modify the product.
  - Doing so may cause malfunction.
- 3. Inspect periodically.
  - If fittings or screws become rusted, mounting parts may deteriorate, resulting in accidents such as falling.
- 4. Mount screws and connectors with the specified torque.
  - Failure to do this may result in accidents such as falling.
- 5. Work at high locations should be done by a qualified technician. Installation requires skill and experience.
  - Always rely on an installation specialist.
- 6. Never use screws other than those included or specified.
  - Using non-specified screws may cause accidents such as falling.
- 7. Take measures to prevent falling when carrying out installation or removal work. Also check before work that there are no people in the surrounding area.
  - Failure to heed this precaution may result in injury due to falling.
- 8. Do not install in regions susceptible to major salt damage, or at locations where corrosive gas is emitted.
  - This will cause deterioration of mounting parts, and may result in accidents such as falling.
- 9. Inspect after a typhoon or earthquake.
  - Fitting breakage or screw loosening due to shaking may result in accidents such as falling.
- 10. If the antenna will not be used, do not leave it in place. Always remove it.

11. Do not insert a screw etc into the drainage hole (8 holes).

It may cause a failure and/or water immersion.

12. Do not hold the GPS antenna by using drainage hole (8 holes). It may cause a trouble such as dropping etc.

#### **Quality Assurance Period**

The quality assurance period of GPS Products(GPS antennas) is thirteen months from the date of shipment from Panasonic Corporation.

#### Scope of Assurance

- 1. If any latent defect is found in the GPS Products during the above assurance period and if any damage is incurred (when the GPS Product develops trouble by reasons on the part of Panasonic), such defective part of the GPS Product will be repaired or replaced.
- 2. If said defective GPS Product is already delivered to a third party by You, You shall conduct such repair or replacement. Panasonic shall deliver to you free of charge such repair or replacement parts required at that time.
- 3. If any claim is raised against Panasonic by You for the defective GPS Products, the remedy for such claim shall be solely limited to either replacing such defective GPS Products or refunding their purchase price as selected by Panasonic.
  - Panasonic shall not be liable to any payment for the loss in excess of the purchase price of the GPS Products. Furthermore, Panasonic shall not be liable any loss of usage, time, business or benefit or for any collateral or consequential damages arising out of the use or non-use of the GPS Products.
- 4. Panasonic shall not be liable for any damages arising from any defect in the GPS Products found after the assurance period.
- 5. Panasonic shall not be liable for any responsibility set forth above even during the assurance period if any of the following is applicable in relation to the GPS Products:
  - a) Damages arising from the specifications, standards, installation method, etc., specified by You.
  - b) Damages arising after delivery due to alteration in construction, performance, specifications, etc.
  - c) Damages arising from natural characteristics of the materials used such as natural wear, rust, transformation, discoloration, etc., or from changes occurring from the lapse of time.
  - d) Phenomena or damages arising from such phenomena which were not preventable by the technique that was put into practice at the time the individual contract for the GPS Products was executed.
  - e) Damages or accidents that occurred were not promptly reported to Panasonic (within 30 days).
  - f) Damages due to abuse or misuse by persons other than Panasonic employees.
  - g) Damages arising from acts of God such as earthquake, fire, flood, etc., or from force majeure.
  - h) Damages due to improper use not in line with the GPS Product specifications, acceptance specifications, instruction manuals, catalogs, etc.
  - i) Damages due to use, storage, transit, etc., not in accordance with the environmental conditions (temperature, humidity, atmospheric pressure, hydraulic pressure, etc.) that were normally expected at the time of development, manufacture and sale.
  - j) Damages that could have been prevented if a machine of You or of a third party into which the GPS Products are incorporated for use is equipped with functions or structures generally required as necessary in the industry.
  - k) Damages arising only when used under a particular combination of products as designed by You or a third party and not by Panasonic.
  - I) Damages due to inappropriate storage.
- m) Damages arising from other reasons which Panasonic is not responsible.

This Table is prepared in accordance with the provisions of SJ/T11364.

Note: We request that above material disclosure table is disclosed in your product instruction manuals when the product in this specification sheet is sold into or within China.

O: Indicates that said hazardous substance contained in all of the homogeneous materials for this part is below the limit requirement of GB/T26572.

X: Indicates that said hazardous substance contained in at least one of the homogeneous materials used for this part is above the limit requirement of GB/T26572.
